

Grabwire Safety Switches

CDPD216

Issue 1

Product Introduction

Enclosed safety (grabwire) switches are the equipment of choice to provide safety protection over long distances.

Prior to the development of Grabwire switches, machinery such as conveyors had to be fitted with a number of separate Emergency Stops. Positioning the 'Stops' such that at least one could be reached from any point, was often difficult to fulfil.

Product Features

- Rope tension is included with all grab wire products.
- All grabwires Comply with AC15 to BS EN 60947-5-1.
- Setting up indicator, Hand reset knob and universal (LH or RH) mounting are applicable to all the grabwires within our range.
- The 'Gw' range has a connection kit that comes along to install the grabwire. In the kit you will find all the parts necessary to install the system
