

Stainless Steel Enclosed Switchgear

CDPD220

Issue 1

Product Introduction

Craig & Derricott has been at the forefront of switchgear design and manufacture for more than 70 years, and in that time the requirements of the installer & end user have always been paramount in the design concept.

A range of isolation equipment housed in Grade 304 stainless steel enclosures sealed to IP66. As a standard feature the units have the ability to add a selection of auxiliary blocks providing additional contacts and a choice of Neutral assemblies.

Product Features

- All stainless steel enclosures are sealed up to IP66.
- All units have a padlockable handle which allows for the insertion of up to three padlocks in the 'off' position thus preventing the isolator being switched to the 'on' position.
- All units are supplied with a handle manufactured from a material suitable to withstand cleaning products containing sodium hydroxide.
- Stainless Steel Grade 316 enclosures are available on request.
