

BESPOKE DESIGN ENGINEERING

Craig & Derricott has been a supplier to the Industrial & Transport sector for more than 95 years and in that time has earned a reputation for well engineered products with the ultimate in reliability.

We have a dedicated team of specialist engineers who can draw upon their vast experience to provide you with a unique design solution to meet your specific requirements. CAD modelling & rapid prototyping can be arranged along with full environmental testing according to the needs of the specification. You can simply hand over your project to us and we will create the ideal and most cost effective solution to your requirements.
